NEW CLASSES!

NUTS ABOUT SCIENCE

After School Science at Silver Springs!

Our Fall session of classes is called… Science Explorers!

As science explorers we investigate the many fields of science in this eight-week session of classes! Students will join us in a spooky Halloween Science lab, learn all about air, germs, buoyancy, light, create catapults and much more!! *A full description of each class is on the next page.

Who: Students in Grades 1st-5th
When: 3:45 - 5:00 pm on Tuesdays
Dates: 9/22, 9/29, 10/06, 10/13, 10/20, 10/27, (no school 11/03), 11/10, 11/17 (make-up date is 11/24 if a class is cancelled due to instructor illness or inclement weather)
Where: Silver Springs Elementary: Art Room
Tuition: $220 per student; $175 for student with a parent helper, parent helpers must attend all 8 weeks; All materials are included. *This event is sponsored by Silver Springs PTA, $5 per student goes to the PTA as a fundraiser.*

Registration Steps:

- Visit our website at: www.nutsaboutscience.com or use the QR code below
- Click on the REGISTER button
- Follow the registration steps on Active Network
- Contact Jennifer Price at jenniferp@nutsaboutscience.com with any questions

Registration opens August 25th at 8 am and closes September 11th at 11pm

Class Information: Students should go directly to science class after school.

Snack: Please provide your child with a **healthy** snack to enjoy at the beginning of the class.

Absences: Email us if your child will be absent. Materials from a missed class will be given to a student the following week. Sorry, no refunds.

Pick up Policy: Students must be picked up at 5:00 pm from the **Front Door**. *There is a $10 late fee if a student is picked up after 5:15 pm.* Students who attend Kids Club will be escorted there.

QUESTIONS? Email Jennifer Price at jenniferp@nutsaboutscience.com

Science Explorers Class Descriptions:

Back to School Science
Let's get back into the swing of school with this fun, interactive class! First, we discuss the scientific method, second using the scientific method we measure and mix solids and liquids to see if they explode! Then we go outside for the Mentos-Diet Coke experiment!

Light, Color Action
What is light? What is color? Come to this class and discover the science behind light and color by experimenting with amazing color changing beads and making a disappearing color wheel.

All About Air
Students will learn the fundamental properties of Air: it occupies space, has weight, and exerts pressure by watching the Egg-in-a-Bottle trick. Then students will build and race an air powered car. Ready, set, blow!

Will it Float?
Why do some things float and others don't? Students learn about buoyancy as we test items to see if they float, play Stump the Teacher where students are challenged to bring an item from home to see if the teacher can guess if it will float! Then we, make a Cartesian diver that swims.

Germs, Bacteria & You
Students learn which germs could be living on their hands as we take the hand-washing challenge! In this class we discuss germs, bacteria, and viruses. We'll use Glitterbug Potion and a mini-ultraviolet light, color a germ Shrinkle, and search for germs in the classroom!

Halloween Science
Join us for this spooky science activity as we create a Halloween Science lab and make some cool concoctions including black light secret messages and Boo Bubbles. Ooohh scary!!

Problem-Solving Superstars!
In this hands-on class, students become problem-solving superstars. They tackle fun challenges, collect simple data, and learn how to spot patterns, share ideas, and explain their thinking. Every activity builds confidence, teamwork, and a love of figuring things out.

Craft-stick Catapults
Students become junior engineers as they build working launchers from scratch. Once construction is complete, we transform the classroom into a safe test range to launch projectiles, track flight paths, and see if we can score a bullseye.
